KEY IMPLEMENTATION HIGHLIGHTS

- ✓ **Responsive Grid:** Built with Bootstrap 5 and custom media queries for seamless display across desktop, tablet, and mobile devices.
- ✓ **Glassmorphism Aesthetic:** Modern frosted-glass visual styling utilizing backdrop blur effects, translucent borders, and ambient floating light blobs.
- ✓ **Theme Toggle Engine:** Custom JavaScript dark/light mode toggle with state persistence stored in localStorage.
- ✓ **Interactive Components:** Smooth navigation scrolling, scroll-reveal element animations via IntersectionObserver, and active navbar tracking.

JAVASCRIPT INTERACTIVITY LOGIC (APP.JS)

```
// Dark / Light Theme Toggle Switcher
const themeToggle = document.getElementById("themeToggle");
const body = document.body;
const icon = themeToggle.querySelector("i");

if (localStorage.getItem("theme") === "light") {
  body.classList.add("light-mode");
  icon.classList.replace("bi-moon-stars", "bi-sun");
}

themeToggle.addEventListener("click", () => {
  body.classList.toggle("light-mode");
  const isLight = body.classList.contains("light-mode");
  icon.classList.replace(isLight ? "bi-moon-stars" : "bi-sun", isLight ? "bi-sun" : "bi-moon-stars");
  localStorage.setItem("theme", isLight ? "light" : "dark");
});
```

SUBMISSION DECLARATION

I hereby verify that Task 1 (Responsive Portfolio Website) has been fully built, tested, and deployed in compliance with InternSpark evaluation requirements.
