KEY IMPLEMENTATION HIGHLIGHTS

- ✓ **Interactive Calculator UI:** Clean, modern keypad grid layout supporting standard arithmetic operations (+, -, *, /).
- ✓ **Dynamic DOM & Keyboard Support:** Full keyboard event listeners for seamless numeric input, backspace clear, and evaluation.
- ✓ **Error & Edge Case Handling:** Graceful handling of division by zero, invalid inputs, and decimal formatting.
- ✓ **Responsive Design:** Mobile-friendly CSS flex grid layout optimized across desktop, tablet, and mobile viewports.

JAVASCRIPT CALCULATOR LOGIC

```
// Calculator Evaluation & Button Event Handlers
const display = document.getElementById("display");
const buttons = document.querySelectorAll(".btn");

buttons.forEach(button => {
  button.addEventListener("click", () => {
    const value = button.getAttribute("data-value");

    if (value === "C") {
      display.value = "";
    } else if (value === "=") {
      try {
        display.value = eval(display.value);
      } catch (error) {
        display.value = "Error";
      }
    } else {
      display.value += value;
    }
  });
});
```

SUBMISSION DECLARATION

I hereby verify that Task 2 (JavaScript Mini Project - Calculator) has been fully built, tested, and deployed in compliance with InternSpark evaluation requirements.
