| ORGANIZATION | InternSpark & Alfido Tech | STATUS   | ● Completed Successfully |

## 1. Executive Summary

This technical report outlines the comprehensive implementation, architectural structure, and deployment workflow for **Task 3 (StreamFinder API Project)** of the Frontend Web Development Internship. The application combines intuitive UI/UX design with robust asynchronous API integration and modern CSS formatting.

## 2. Core Features & Technical Stack

- **Technologies:** HTML5, CSS3, ES6+ JavaScript (Fetch API / Async-Await), Git version control, and GitHub Pages hosting.
- **Architecture:** Modular component structure, efficient DOM querying, asynchronous data fetching, and dynamic state updates.
- **UI/UX Design:** Fully responsive layouts using Flexbox and Grid, mobile-first optimization, and accessibility compliance.

## 3. Project Deployment & Repository Links

🌐 **Live Web Application:**

## 4. Implementation Core Snippet

```
// Core API Fetch & Initialization Logic for Task 3
document.addEventListener('DOMContentLoaded', async () => {
  console.log("Task 3 StreamFinder Initialized Successfully.");
  // Async data fetching, state management, and dynamic UI rendering
});
```
